

## Simplifying Access to Your Health Information

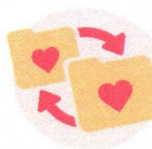

### **One Login for Your Healthcare**

Access any MyChart account linked to MyChart Central with a single login: your Epic ID. It's the last MyChart login you'll ever need.

### **No Password Needed**

With login options like Face ID and passkeys, MyChart Central gives you a password-free experience across your MyChart accounts.

### **Your Information Follows You**

If your basic contact information changes, update it once and automatically share it with your linked organizations. When you go to a new organization, MyChart Central carries this information over—no need to repeat yourself.

### **All in the MyChart Experience**

MyChart Central makes it easier for you to access all that you love about MyChart—like scheduling appointments, communicating with care teams, and managing your care from home.
