We would like to take this opportunity to welcome you to our practice. We appreciate the opportunity to provide your child's health care. It is a privilege for us to share in the journey of your child from a fully dependent newborn to a capable young adult.

Attached, you will find the required forms needed for you to establish care at Cape Cod Pediatrics. Once we are in receipt of your completed forms, your child will be registered as a patient of Cape Cod Pediatrics.

We do ask that you please contact your health insurance company to list one of our doctors (MDs) as the primary care physician.

Cape Cod Pediatrics is a practice that strongly believes in the benefits of childhood immunizations as part of providing outstanding healthcare for your family. Cape Cod Pediatrics follows the recommended vaccine schedule created by the American Academy of Pediatrics. For the health and welfare of all children who come to our office, all children are required to vaccinate. If you choose not to vaccinate or not to continue with the recommended vaccine schedule, we may request that you switch your child's care to an office that shares your immunization philosophy.

If you are transferring from another practice, kindly forward a copy of your child's medical records and applicable specialists' records. Once Cape Cod Pediatrics is in receipt of your child's complete medical records, you can then schedule your child's first Well Child Visit.

Again, we thank you for choosing Cape Cod Pediatrics and look forward to caring for your child.

Sincerely,

Roshann Hooshmand, MD and Marie Kayton, MD
